

Bethel Chair

Bethel is a modern version of the traditional chapel chair designed exclusively for Trinity Church Furniture by British designer Bruce High. Bethel is an all wood, lightweight, stackable church chair. The strong and durable beech wood frame has been beautifully designed using complementary wood joints and is available in numerous stains.

A purpose designed stacking trolley allows the chairs to be neatly stowed and manoeuvred whilst taking up a limited amount of floor space. The armchair and upholstered versions are also stackable. The simple and easy-to-use brace-style linking system allows for quick and efficient changes to your seating arrangements.

Rather than using unsightly bolts and metal fixings, the British designed Bethel chair employs traditional joinery techniques to give it the strength needed to withstand the rigours of persistent moving and stacking on hard floors

Stackable

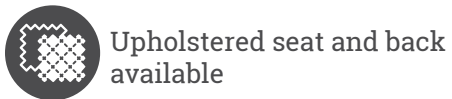

Available with arms

Book holder available

Stain to match

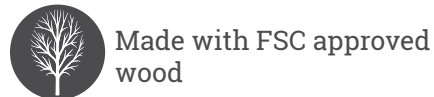

Upholstered seat and back available

Can be linked together

10 year guarantee

Made with FSC approved wood
